<110> Has your company received its ETC certification from the FCC? (yes / no) ☐ ☒

If your answer to Line <110> is yes, do you have an existing § 54.202(a) "5 year plan" filed with the FCC? (yes / no) ☐ ☐

If your answer to Line <111> is yes, then you are required to file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

<112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

310713mi112.pdf

Name of Attached Document

Please check these boxes below to confirm that the attached documents(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to § 54.202(a). The information shall be submitted at the wire center level or census block as appropriate.

<113> Maps detailing progress towards meeting plan targets

<114> Report how much universal service (USF) support was received

<115> How (USF) was used to improve service quality

<116> How (USF) was used to improve service coverage

<117> How (USF) was used to improve service capacity

<118> Provide an explanation of network improvement targets not met in the prior calendar year.

UNFULFILLED SERVICE REQUESTS (BROADBAND) - 2013 (320/330)

STUDY AREA CODE: 31713

	CUSTOMER AREA	DESCRIPTION OF SERVICE REQUESTED	DESCRIBE HOW CARRIER ATTEMPTED TO PROVIDE SERVICE
1	Nevins Lake	Requested 1.5/512 or dial-up; Company has 1.5/512 and dial-up capabilities to this area. 1.5/512 and dial-up transported via an older T1 circuit. T1 is at capacity; Company cannot add additional customers with the equipment in place. Also, the at-capacity T1 is already creating intermittent, inferior quality 1.5/512 and dial-up services for current customers with these services.	Company evaluating economic feasibility of upgrading facilities to deliver higher speed broadband options to these remote areas.
2	Deer Park 1	Requested 1.5/512 or dial-up; Company has 1.5/512 and dial-up capabilities to this area. 1.5/512 and dial-up transported via an older T1 circuit. T1 is at capacity; Company cannot add additional customers with the equipment in place. Also, the at-capacity T1 is already creating intermittent, inferior quality 1.5/512 and dial-up services for current customers with these services.	Company evaluating economic feasibility of upgrading facilities to deliver higher speed broadband options to these remote areas.
3	Deer Park 2	Requested 1.5/512 or dial-up; Company has 1.5/512 and dial-up capabilities to this area. 1.5/512 and dial-up transported via an older T1 circuit. STATEMENT REGARDING
SERVICE QUALITY STANDARDS &
CONSUMER PROTECTION RULES COMPLIANCE (500/510)**

The annual reporting requirements for ETCs require a certification of compliance with applicable service quality standards and consumer protection rules. **Hiawatha Telephone Company** ("Carrier") is certifying that it has complied, and will continue to comply, with all applicable service quality standards and consumer protection rules.

As a licensed telecommunications carrier in Michigan, Carrier is subject to the Michigan Telecommunications Act (MTA) and Michigan Public Service Commission (MPSC) jurisdiction. The Company must comply with the numerous obligations relating to telecommunications service set out in the MTA, rules the MPSC adopts under the MTA, the federal Communications Act (FTA), and rules the Federal Communications Commission (FCC) adopts under the FTA. Carrier must also comply with all applicable and effective state and federal consumer protection and service quality standards.

Carrier is an incumbent local exchange carrier in Michigan who has operated for many years in the telecommunications industry. Throughout its time in the regulated telecommunications industry, Carrier has experienced varying degrees of regulations as well as regulation changes. Carrier has mechanisms in place to review and stay abreast of changes in regulations. Carrier has been a long-standing member of both state and federal industry associations who aid in our regulation awareness and compliance. Carrier also relies on the

services of consultants and attorneys when appropriate to help us stay informed on changes in state and federal regulations. Carrier has established processes and procedures to ensure employee compliance with implemented consumer protection and service quality standards. Periodic updates and training are offered to employees actively involved in business operations related to consumer protection and service quality standards.

Carrier has a Customer Proprietary Network Information (CPNI) Manual, which reflects the FCC's current CPNI rules. Also, the Carrier certifies with the FCC on an annual basis that it complies with the FCC's CPNI rules. Carrier has implemented an Identity Theft Prevention Program in accordance with the federal Red Flags rules. Carrier notifies its customers of their rights, custom calling features, and the Do-Not-Call registry. Carrier has implemented an automated process in which the new customer disclosure for new voice customers is auto-populated on to new customers' bills. Carrier's broadband service terms and conditions are available on Carrier's website or upon customer demand. In addition to passing through all state and federal Lifeline discounts to applicable customers, Carrier also notifies customers of the Lifeline programs and how to apply if eligible.

FCC FORM 481

STATEMENT REGARDING FUNCTIONALITY IN EMERGENCY

SITUATIONS (600/610)

STUDY AREA CODE: 310713

Hiawatha Telephone Company ("Carrier") certifies that it is able to function in emergency situations as set forth in § 54.202(a)(2) and Rule 46 of the MPSC's Service Quality Rules (2000 AC, R 484.546). Carrier has and continues to comply with these requirements. Carrier's network is designed to remain functional in emergency situations without an external power source, has redundancy in its network for use in re-rerouting traffic when facilities are damaged, and its network is engineered to provide maximum capacity in order to handle excess traffic in the event of traffic spikes resulting from emergency situations.

Carrier operates in nine exchanges (Munising, Deer Park, Grand Marais, Shingleton, Seney, Hulbert, Eckerman, Hiawatha Forest, and Paradise). Carrier has a central office, wire centers, and remote cabinets in each exchange. Each central office and all wire centers and remote cabinets are equipped with permanent battery back-up power. The central offices and all of our wire centers and remote cabinets include battery back-up for a minimum of eight hours without generators or re-charging. Carrier also has a permanent, stand-by generator at each central office. The permanent stand-by generator, combined with the permanent battery back-up enable Carrier's central offices to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic. Carrier has multiple portable generators available to be dispatched to remote cabinets on an as needed basis. Remote cabinets

are equipped with a portable generator plug to accommodate the portable generators. The permanent battery back-up and portable generator(s) enable Carrier's remote cabinets to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic.

Part of our five year build-out strategy is to engineer and build the new fiber optic backbone routes in diverse ring configurations to provide additional circuit protection in the event of a cable cut. Our equipment balances based on the traffic load. Traffic is rebalanced automatically on the main path facilities to alleviate congestion in our networks. In sporadic instances where a backbone link goes down and is then restored, our equipment is set to automatically return to service and rebalance the traffic.

Some local access links such as to remote cabinets have only one main link to our central office. These links could cause service outages to a limited number of subscribers if a link was cut or equipment catastrophically failed. The equipment is all redundant such that traffic remains up through any single card or interface failure.

Carrier uses armored cable and route/link diversity as much as economically feasible to protect connections. Our maintenance crews respond very quickly if a cable is cut and causes an outage.
